## Education

| | |
|---|---|
| **SGSITS,INDORE** | **July 2018 – April 2022** |
| *B.Tech in Information Technology* | *CGPA-7.32/10* |

## Technical Skills

**Languages**: Java, Python, C
**Frontend**: HTML, CSS, JavaScript, React
**Backend**: Spring boot, Hibernate, REST API, Microservices, Node js, MySQL, JDBC
**Developer Tools**: Maven, Gradle, Postman, Git, Linux

## Experience

**Shiavnski Technology LLP** — **March 2024 — Present**
*Software Developer Intern* — *Indore*

- Spearheaded the creation of a Contact Management System leveraging the **Spring Boot** framework.
- Engineered **RESTful** APIs to facilitate seamless contact management, encompassing comprehensive CRUD functionalities.
- Integrated **Spring Data JPA** framework for database interaction and implemented data persistence.
- Employed JSON Web Tokens (**JWT**) to authenticate users across various roles within the system, ensuring secure access and authorization.

**Shiavnski Technology LLP** — **Feb 2024 — March 2024**
*Software Developer Intern* — *Indore*

- Created a versatile web crawler capable of traversing multiple websites efficiently leveraging **Jsoup**.
- Integrated a mechanism to automatically identify and recrawl failed URLs, ensuring comprehensive data collection.
- Enabled seamless downloading of webpage content for each URL, facilitating offline access for analysis
- Implemented an **O(1)** time complexity algorithm for checking URL existence within the local system, enhancing retrieval efficiency.

**White Feather Consultancy** — **April 2023 — June 2023**
*Java Developer Intern* — *Bhopal, Remote*

- Assisted in the creation of a robust Library Management System using Java and MySQL.
- Integrated **JDBC** for seamless database interaction.
- Optimized database queries and reduced query response times by **15**% enhancing the system's performance and responsiveness

**THE SPARKS FOUNDATION** — **MAY 2021 – JUNE 2021**
*Web Development Intern* — *Singapore, Remote*

- Developed a visually appealing and user-friendly donation website for animals, and raised awareness about animal health through the website.
- Enabled users to donate conveniently using multiple online payment methods, such as Card and UPI.
- Implemented **RazorPay** as the payment gateway, resulting in a 20% reduction in transaction processing time and improved user experience.

## Projects

**EmpowerPro** | *Java, Swing(Java), iText, MySQL, Multi-threading, Socket Programming* — **August 2023**

- A network application designed to streamline and automate employee management.
- Introduced **proxy classes** to facilitate network communication, and developed request and response wrappers for proper code separation.
- Integrated **JDBC** with **MySQL** to establish data connectivity,enablingstreamlined interaction and manipulation.
- Integrated **iText**, a potent PDF generation library, to dynamically generate professional data reports.

## Achievements

**Contributed to open source during Hacktoberfest-2023**
**Walmart Global Tech Virtual Advanced Software engineering**——Link
